TC#1	Patient's Login
Purpose:	Testing Patient's Login.
Prerequisite:	<ol style="list-style-type: none"> 1. User Have the link to the website. 2. User in the login page. 3. User already exists in the database.
Priority:	High Priority
Steps:	<ol style="list-style-type: none"> 1. Open homepage. 2. Click on Login in navbar or button in the cover. 3. Type Your Email and Password. 4. Click Login or Press Enter.
Expected Results:	<ul style="list-style-type: none"> • In case of Successful Login : Showing User's home page with user's name in the navbar. • In case of Failure in login due to wrong password or email User should be notified with the reason of this failure. • When user is deactivated (Status = 0 in database)they shouldn't be able to login.
Actual Results:	<ul style="list-style-type: none"> • In case of Successful Login : Showing User's home page with user's name in the navbar. • In case of Failure in login due to wrong password or email User is notified with a message "These credentials do not match our records." • When trying to login using the email of a deactivated user account, the web page displays a message notifying the user that credentials do not match the records in Database (same as the case with wrong password or email).
State:	Pass
Issue #:	
Execution Date:	29 March 2018
Build Version:	725f2128
Notes and Questions:	<ol style="list-style-type: none"> 1. After Login When I click on my name why there's not any other options like Show Profile? <p>Suggestion:</p> <ol style="list-style-type: none"> 1. If the patient is inactive ,Can we show him/her a message when they try to login ,it can say that "Your account has been

	deactivated.Please Contact us if you have a problem with this or to fix this".
Tester Name:	Aisha Mousa

TC#2	Nurse Login
Purpose:	Testing Nurse Login page
Prerequisite:	<ol style="list-style-type: none"> 1. User Have the route of "nurse/login" to the website. 2. User in the login page. 3. User already exists in the database.
Priority:	High Priority
Steps:	<ol style="list-style-type: none"> 1. Open Website. 2. Click on Login in navbar or button in the cover. 3. Type Your Email and Password. 4. Click Login or Press Enter.
Expected Results:	<ol style="list-style-type: none"> 1. When email and password are matched in Database, nurses should be able to view their homepage and have access to profile and assigned functionalities. 2. If either email or password are incorrect ,the login page displays on-screen message informing the nurse of the problem. 3. When nurse's account is deactivated (Status = 0 in database)they shouldn't be able to login.
Actual Results:	<ol style="list-style-type: none"> 1. When trying logging in with correct email and password nurses are redirected to nurse default homepage with their name in the navigation bar and provided with all nurses functionalities . 2. When trying to login with an incorrect email or password, a message appears on screen notifying the nurse that credentials do not match the records in Database. 3. When trying to login using the email of a deactivated nurse account, the web page displays a message notifying the nurse that credentials do not match the records in Database (same as the case with wrong password or email).
State:	Pass
Execution Date:	29/3/2018

Build Version:	907f5875922d58383c0e8c727458ceefdbba62cd
Notes and Questions:	<ul style="list-style-type: none"> Nurses should be notified when account is deactivated to avoid unnecessary failed login attempts and seek reactivation by contacting admins of the clinic.
Tester Name:	Reham Hamdy

TC#3	Admin Login
Purpose:	Testing Admin Login page
Prerequisite:	<ol style="list-style-type: none"> User Have the route of admin/login to the website. User in the login page. User already exists in the database.
Priority:	High Priority
Steps:	<ol style="list-style-type: none"> Open Website. Click on Login in navbar or button in the cover. Type Your Email and Password. Click Login or Press Enter.
Expected Results:	<ol style="list-style-type: none"> When email and password are matched in Database, the admin should be able to view their homepage and have access to profile and assigned functionalities. When trying to login with an incorrect email or password, a message appears on screen notifying the admin that credentials do not match the records in Database. When trying to login using the email of a deactivated admin account, the web page displays a message notifying the admin that credentials do not match the records in Database (same as the case with wrong password or email)
Actual Results:	<ol style="list-style-type: none"> When trying logging in with correct email and password admin is redirected to admin default homepage with their name in the navigation bar and provided with all admins functionalities . When trying to login with an incorrect email or password, a message appears on screen notifying the admin that credentials do not match the records in Database. When trying to login using the email of a deactivated admin account, the web page displays a message notifying the admin

	that credentials do not match the records in Database (same as the case with wrong password or email).
State:	Pass
Issue #:	
Execution Date:	29/3/2018
Build Version:	f81b38bd8a77f7a157f86d18b74ab4cbbfad9bb0
Notes and Questions:	<ul style="list-style-type: none"> Admins should be notified when account is deactivated to avoid unnecessary failed login attempts and seek reactivation by contacting admins of the clinic.
Tester Name:	Reham Hamdy

TC#4	Nurse's Profile
Purpose:	Testing Nurse's profile actions.
Prerequisite:	1- Nurse has already logged in.
Priority:	Low Priority
Steps:	1- Login as a nurse. 2- Click on your name in navbar then click profile or click Profile from side navbar. 3- To update nurse's information click "Update Info" which is the default page when you click profile.
Expected Results:	-When a nurse navigate to their profile, he/she should be able to view their own information and be able to change them. -When any update in profile occurs or fails,there should be a message to tell the user that update happened successfully or failed with the reason of failure. -Available links to change profile picture and password.
Actual Results:	-When a nurse navigate to their profile, he/she can view their own information and can change them.

	-When any update in profile occurs or fails,there is a message to tell the user that update happened successfully or failed with the reason of failure. -Available links to change profile picture and password.
State:	Pass
Issue #:	
Execution Date:	29 March 2018
Build Version:	a9ae35f9
Notes and Questions:	
Tester Name:	Aisha Mousa

TC#5	Admin's Profile
Purpose:	Testing Admin's profile actions.
Prerequisite:	1- Admin has already logged in.
Priority:	Low Priority
Steps:	<ol style="list-style-type: none"> 1. Login as an admin. 2. Click on your name in navbar then click profile or click Profile from side navbar. 3. To update admin's information click "Update Info" which is the default page when you click profile.
Expected Results:	-When an admin navigate to his/her profile, he/she should be able to view their own information and be able to change them. -When any update in profile occurs or fails,there should be a message to tell the user that update happened successfully or failed with the reason of failure. -Available links to change profile picture and password.
Actual Results:	-When an admin navigates to his/her profile, he/she can view their own information and can change them.

	-When any update in profile occurs or fails,there is a message to tell the user that update happened successfully or failed with the reason of failure. -Available links to change profile picture and password.
State:	Pass
Issue #:	
Execution Date:	29 March 2018
Build Version:	c3152b97
Notes and Questions:	
Tester Name:	Aisha Mousa

TC#6	Patient Profile (change profile picture)
Purpose:	Testing functionalities of Patient Profile page
Prerequisite:	1. Patient is logged in and can access their web pages.
Priority:	Low Priority
Steps:	1. Open Homepage (user/home). 2. Choose the Profile option on the navigation bar in homepage.
Expected Results:	1. when clicking on Profile the user is directed to a web page that displays their profile info (name,email,image, ..) allowing them to make changes and submit them to Database. 2. "change profile photo "allows the user to choose a photo from pc and assign it as a profile picture. 3. If user alters info about name,email,mobile,gender or date of birth and submits what they have done ,the info is changed in Database and the profile page refreshes displaying updated information. 4. When user goes to "change password " tab ,enter their old password ,compose a new password that is more than 6 chars and confirm it they should be able to change their login password correctly.If old password is incorrect or new password is not confirmed, the password doesn't change and the user is notified of their error.

Actual Results:	<ol style="list-style-type: none"> 1. The profile page displays all user's info and enables them to update. 2. changing profile picture displays the chosen photo properly in profile and successfully stores its path in Database. 3. User can change their info (name,email,mobile,gender,date of birth) in Database successfully given the updated info can hold the validation required. 4. when submitting the old password and entering a confirmed new password that is at least 6 chars, password is changed successfully. In Case of an incorrect old password and a confirmed new password, a message is displayed to the user saying " Old password is wrong". If new password is not confirmed, password doesn't change and the message reads " the new password and confirm must match",also incase of a password that is less than 6 chars a message is displayed asking the user to enter a password that is at least 6 chars long.
State:	Pass
Issue #:	
Execution Date:	29/3/2018
Build Version:	de391c26
Notes and Questions:	<ul style="list-style-type: none"> • The user can change their password to the previous password without being stopped or notified .
Tester Name:	Reham Hamdy

TC#7	Patient's Logout
Purpose:	Testing Patient's Logout
Prerequisite:	<ol style="list-style-type: none"> 1- User have the link to the website. 2- User has already logged in.
Priority:	Low Priority

Steps:	1- Login. 2- Click on user's name in navbar . 3- Click Logout.
Expected Results:	-User has been logged out. -Login Page shows up.
Actual Results:	-User has been logged out. -User's Home Page shows up.
State:	Pass
Issue #:	
Execution Date:	1 April 2018
Build Version:	725f2128
Notes and Questions:	1- After logging out shouldn't that take user to the login page ?!!
Tester Name:	Aisha Mousa

TC#8	Patient's Remember Me
Purpose:	Testing remember me when patient tries to login.
Prerequisite:	1- User Have the link to the website. 2- User in the login page. 3- User already exists in the database.
Priority:	Low Priority
Steps:	1- Open homepage. 2- Click on Login in navbar or button in the cover. 3- Type Your Email and Password. 4- Click Remember me.
Expected Results:	- "Remember me "should allow the browser to let a certain patient access their pages directly without login for some while after one successful login.
Actual Results:	The browser always remember the logged-in nurse whether "Remember Me " was selected or not until the nurse logs out manually.

State:	Fail
Issue #:	ISS #3
Execution Date:	1 April 2018
Build Version:	725f2128
Notes and Questions:	
Tester Name:	Aisha Mousa

TC#9	Patient's Reset Password
Purpose:	Testing Patient's reset password when they forget their password.
Prerequisite:	1- User Have the link to the website. 2- User in the login page. 3- User already exists in the database.
Priority:	Low Priority
Steps:	1- Open homepage. 2- Click on Login in navbar or button in the cover. 3- Click Forgot your password. 4- Type your mail. 5- Click "Send Password Reset Link".
Expected Results:	-User receives a mail with a link to take him/her to a page where they can enter their email and a new password. -After entering the new password the user should be logged in or log in page shows up to ask user to login again.
Actual Results:	-User receives a mail with a link to take him/her to a page where they can enter their email and a new password. -After entering the new password the user should be logged in and the user's home page appears.
State:	Pass
Issue #:	
Execution Date:	1 April 2018

Build Version:	725f2128
Notes and Questions:	
Tester Name:	Aisha Mousa

TC#10	Nurse's Change Password from profile
Purpose:	Testing Nurse's change password after logging in from profile.
Prerequisite:	1- Nurse has already logged in. 2- Nurse is in profile page.
Priority:	Low Priority
Steps:	1- Login as a nurse. 2- Click on your name in navbar then click profile or click Profile from side navbar. 3- To change password click on "Reset Password".
Expected Results:	-When a nurse clicks on reset password, a form with old,new and confirm new password fields to be filled appears. -When Password confirmation doesn't match or the old password is wrong an error message should appear.
Actual Results:	-When a nurse clicks on reset password, a form with old,new and confirm new password fields to be filled appears. -When Password confirmation doesn't match or the old password is wrong an error message appears.
State:	Pass
Issue #:	
Execution Date:	29 March 2018
Build Version:	a9ae35f9
Notes and Questions:	If there's a way to make the password part redirect to itself not to the info part in case of any error occurs it would be better.
Tester Name:	Aisha Mousa

TC#11	Changing Nurse's Profile Picture
Purpose:	Testing Nurse's change profile picture action.
Prerequisite:	1- Nurse has already logged in. 2- Nurse is in profile page.
Priority:	Low Priority
Steps:	1- Login as a nurse. 2- Click on your name in navbar then click profile or click Profile from side navbar. 3- To change profile picture click "Change Profile Picture" under the profile picture.
Expected Results:	-When user clicks on change profile picture an upload dialog should appear to allow user to choose any picture from their device to be their profile picture and after choosing they should be able to see it in profile.
Actual Results:	-When user clicks on change profile picture an upload dialog appears to allow user to choose any picture from their device to be their profile picture and after choosing they can see it in profile.
State:	Pass
Issue #:	
Execution Date:	29 March 2018
Build Version:	a9ae35f9
Notes and Questions:	
Tester Name:	Aisha Mousa

TC#12	Changing Admin's password from profile
Purpose:	Testing admin's change password after logging in from profile.
Prerequisite:	1- Admin has already logged in. 2- Admin is in profile page.
Priority:	Low Priority

Steps:	1- Login as an admin. 2- Click on your name in navbar then click profile or click Profile from side navbar. 3- To change password click on “Reset Password”.
Expected Results:	-When an admin clicks on reset password, a form with old,new and confirm new password fields to be filled appears. -When Password confirmation doesn’t match or the old password is wrong an error message should appear.
Actual Results:	-When an admin clicks on reset password, a form with old,new and confirm new password fields to be filled appears. -When Password confirmation doesn’t match or the old password is wrong an error message appears.
State:	Pass
Issue #:	
Execution Date:	29 March 2018
Build Version:	c3152b97
Notes and Questions:	If there’s a way to make the password part redirect to itself not to the info part in case of any error occurs it would be better.
Tester Name:	Aisha Mousa

TC#13	Changing Admin Profile Picture
Purpose:	Testing admin’s change profile picture action.
Prerequisite:	1- Admin has already logged in. 2- Admin is in profile page.
Priority:	Low Priority
Steps:	1- Login as an admin. 2- Click on your name in navbar then click profile or click Profile from side navbar. 3- To change profile picture click “Change Profile Picture” under the profile picture.

Expected Results:	-When user clicks on change profile picture an upload dialog should appear to allow user to choose any picture from their device to be their profile picture and after choosing they should be able to see it in profile.
Actual Results:	-When user clicks on change profile picture an upload dialog appears to allow user to choose any picture from their device to be their profile picture and after choosing they can see it in profile.
State:	Pass

Notes and Questions:	
Tester Name:	Aisha Mousa

TC#14	Nurse Logout
Purpose:	Testing Nurse Login page
Prerequisite:	1. Nurse is already logged in .
Priority:	High Priority
Steps:	<ol style="list-style-type: none"> 1. In home page press on the user name in the navigation bar . 2. A list will appear containing a logout button.
Expected Results:	1. Nurses can logout of their account at anytime and will be directed to their Login page.
Actual Results:	- Logout works properly and redirects the nurse to login page where in order to access pages again another login is required .
State:	Pass
Issue #:	ISS#1
Execution Date:	29/3/2018

Build Version:	7134ffd1
Notes and Questions:	
Tester Name:	Reham Hamdy

TC#15	Admin Logout
Purpose:	Testing Admin Login page
Prerequisite:	1. Admin is already logged in .
Priority:	High Priority
Steps:	<ol style="list-style-type: none"> 1. In home page press on the admin name in the navigation bar . 2. A list will appear containing a logout button.
Expected Results:	Admins can log out of their account at anytime and will be directed to their Login page.
Actual Results:	Logout works properly and redirects the admin to admin login page where in order to access pages again another login is required .
State:	Pass
Issue #:	
Execution Date:	29/3/2018
Build Version:	7134ffd1
Notes and Questions:	
Tester Name:	Reham Hamdy

TC#16	Patient Profile / change profile photo
Purpose:	Testing user's profile page and changing profile photo
Prerequisite:	<ol style="list-style-type: none"> 1. User is logged in and can access their web pages. 2. User is in profile page.
Priority:	Low Priority

Steps:	<ol style="list-style-type: none"> 1. Open Homepage (user/home). 2. Choose the Profile option on the navigation bar in homepage. 3. Click on "change profile photo"
Expected Results:	<ol style="list-style-type: none"> 1. When clicking on Profile the user is directed to a web page that displays their profile info (name,email,image, ..) allowing them to make changes and submit them to Database. 2. "change profile photo "allows the user to choose a photo from pc and assign it as a profile picture.
Actual Results:	<ol style="list-style-type: none"> 1. The profile page displays all user's info as well as two forms for changing basic info (name,email,mobile,date_of_birth,gender) and user login password respectively,there is also a button "change profile photo "to change user's profile picture. 2. changing profile picture displays the chosen photo properly in profile and successfully stores its path in Database.
State:	<ol style="list-style-type: none"> 1. pass 2. pass

TC#23	Admin Login (reset password option)
Purpose:	Testing resetting password functionality for Admin.
Prerequisite:	<ol style="list-style-type: none"> 1. User Have the route of admin/login to the website. 2. User in the login page. 3. User already exists in the database.
Priority:	High Priority
Steps:	<ol style="list-style-type: none"> 1. Open Website. 2. Click on Login in navbar or button in the cover. 3. Click on "Forget your password ?" link. 4. Enter the email used in login and click on "send reset link" button. 5. After receiving the email press the "nurse reset password " button. 6. In the page of resetting password enter email again , new password ,confirm and press "Reset password".
Expected Results:	Incase of admin forgetting their password, they are able to have a password reset link sent to their email given their email is registered in Database.
Actual Results:	Pressing "Forget your password?" the admin is directed to another page to enter the email to receive the password reset link .The page displays on-screen error is email if not registered in Database .If email address is indeed in Database an email containing a password reset link is sent to admin where by pressing the link they can change password to their account in

	Database successfully, then they are directed to homepage with a message that password has been changed. Admins can press "Back to login " button admin-password/reset page and try again.
State:	Pass
Execution Date:	29/3/2018
Build Version:	7134ffd1
Notes and Questions:	<ul style="list-style-type: none"> • why enter the email address again in password reset page when the admin has been directed to this page by email ?
Tester Name:	Reham Hamdy

TC#24	Admin Login (Remember Me checkbox)
Purpose:	Testing " Remember Me " checkbox for admin
Prerequisite:	<ol style="list-style-type: none"> 1. User Have the route of admin/login to the website. 2. User in the login page. 3. User already exists in the database.
Priority:	Low Priority
Steps:	<ol style="list-style-type: none"> 1. Click on Login in navbar or button in the cover. 2. Type Your Email and Password. 3. Select "Remember Me " checkbox. 4. After logging in restart browser and try to open login page or homepage again.
Expected Results:	"Remember me "should allow the browser to let a certain admin/super admin access their pages directly without login for sometime after one successful login.
Actual Results:	The browser always remember the logged-in admin whether "Remember Me " was selected or not until the admin logs out manually.
