1. Introduction

1.1. Purpose of this Document

This user and admin guide document is written to provide you a guide for how to configure Master Clinic application and use it with best practice and photos to make it clear and also to provide you with the common problem you may face and its solutions and all functionalities of the application that you can use.

1.2. Scope of Project

The project is mainly concerned with building a centralized database system for a MC business, and building modules that allows three types of users (patients - nurses - doctors) to interact together in a fast and easy way. patients can make reservations with their doctors, check their medical file through a web application. Nurses confirm patients' reservations, update patients' information, delete patients, create invoices and manage clinics. Doctors are concerned with patients' files, in terms of their creation, update and deletion, alongside other administrative functions nurses enjoy like accessing patient's information and clinic management, doctors can also access nurses' information and perform all sort of data manipulation.

1.3. Release Information

This is the first version of **Master Clinic** web application (V 1.0 beta) and all new functionalities that we add to this software is provided in release notes document that attached with this document.

1.4. Table of Acronyms and Definitions

Term	Definition
Local host	local service on our PCs
FTP	File Transfer Protocol

Table 1: Table of Acronyms and Definitions

1.5. References

- <https://laravel.com/docs/5.6>
- <http://php.net/downloads.php>
- <https://www.apachefriends.org/download.html>
- <https://getcomposer.org/download/>
- ReleaseNotes_V2.0

1.6. Overview of Document

This document contains some section that provide some help for the user how will use our application such as:

- **Target Platform**

This section contains a description of the target platform of the application.

- **Installation Instructions**

This section contains a full description for how to configure the application and its dependencies to start to work on it.

- **Getting started**

This section contains how to start using the application and its functionalities using simple description provided by some screenshots for every functionality.

- **Usage instructions**

This section provides a full description for how to use this application and its functionalities.

- **Troubleshooting**

This section for providing some common problem you may face and how to solve it.

- **Point of contact**

This is the section that contains how to contact us for any feedback or any problem.

2. Target Platform

This is a third party web application so you need only a modern browser like Google Chrome, Firefox, Safari, ...etc. That means this application can run on all operating systems and platforms like :

- Windows
- Linux
- Mac OS
- Android
- OSX
- Blackberry
- ...etc.

3. Installation Instructions

This application is third party web application developed using Laravel 5.6 framework so it has some dependencies must be installed as mentioned (all installation below is using Linux Ubuntu OS by default and for any other OS you should visit links mentioned below)

- **For local server**
 - PHP >= 7.1.3

The application is developed by PHP language so you need to install new PHP version like 7.1.3 or greater, to install PHP go for this URL <http://php.net/downloads.php> and choose the version you want then install it, or you can install XAMPP program and it contains by default

PHP use this URL <https://www.apachefriends.org/download.html> using this steps:

1. Download the latest version of XAMPP.
2. Open terminal then write ``sudo chmod +x [path to the file downloaded]``.
3. Write this command also ``[path to the file downloaded]`` or just double click on it.
4. Follow the instructions by clicking ``next``.
5. To start the server after installation you can just click on start button or write this command in the terminal ``sudo /opt/lampp/lampp start``.

○ MySQL

The application is using database system to save the data of the users and other important data so we are using MySQL database and for installation

- Just go to this URL <https://dev.mysql.com/downloads/> and choose community tab then you can download the version you want,
- Or you can install XAMPP program like PHP section above it also contains suitable MySQL version.
- Or you can open terminal and type ``sudo apt install php7-mysql``

○ Composer

Composer is a PHP dependency manager and required for laravel and for installing it open terminal and type these commands

1. `php -r "copy('https://getcomposer.org/installer', 'composer-setup.php');"`
2. `php -r "if (hash_file('SHA384', 'composer-setup.php') === '544e09ee996cdf60ece3804abc52599c22b1f40f4323403c44d44fdadd586475ca9813a858088fbc1f233e9b180f061') { echo 'Installer verified'; } else { echo 'Installer corrupt'; unlink('composer-setup.php'); } echo PHP_EOL;"`
3. `php composer-setup.php`
4. `php -r "unlink('composer-setup.php');"`

After installing all these dependencies go to project folder and if you didn't find vendor folder you just open terminal in project folder and type ``composer install`` it will take a while to install all files in vendor folder then the application is ready to work. To start the application type this command in terminal in project folder ``php artisan serve`` and open another terminal and type

`php artisan queue:work` then you can use the application in local host.

For any problem in installation go to this link

<https://laravel.com/docs/5.6> .

- **For online server**

If you have online domain and host you can upload all project folders in “public_html” folder on the server using FTP program like Filezilla or any another program or cpanel provided by your host provider.

4. Getting started

After installing all dependencies as the mentioned in the previous section. open any web browser and for local server type <http://localhost:8000/admin/login> in the URL filed after running the commands mention in the previous section after Composer installation. if the website is hosted on an online server replace localhost:8000 in the previous link with your website domain the result would look like this: <http://domainname/admin/login>. This would open the admin login-page of the website which would look like the following:

MasterClinic Home Contacts Login

Admin Login

Email:

Password:

☐ Remember Me

Login [Forgot Your Password?](#)

© Copyrights 2018 MasterClinic

Figure 1: admin login page

Enter your email and password. Then the your homepage would open choose add clinic from clinics section like the following:

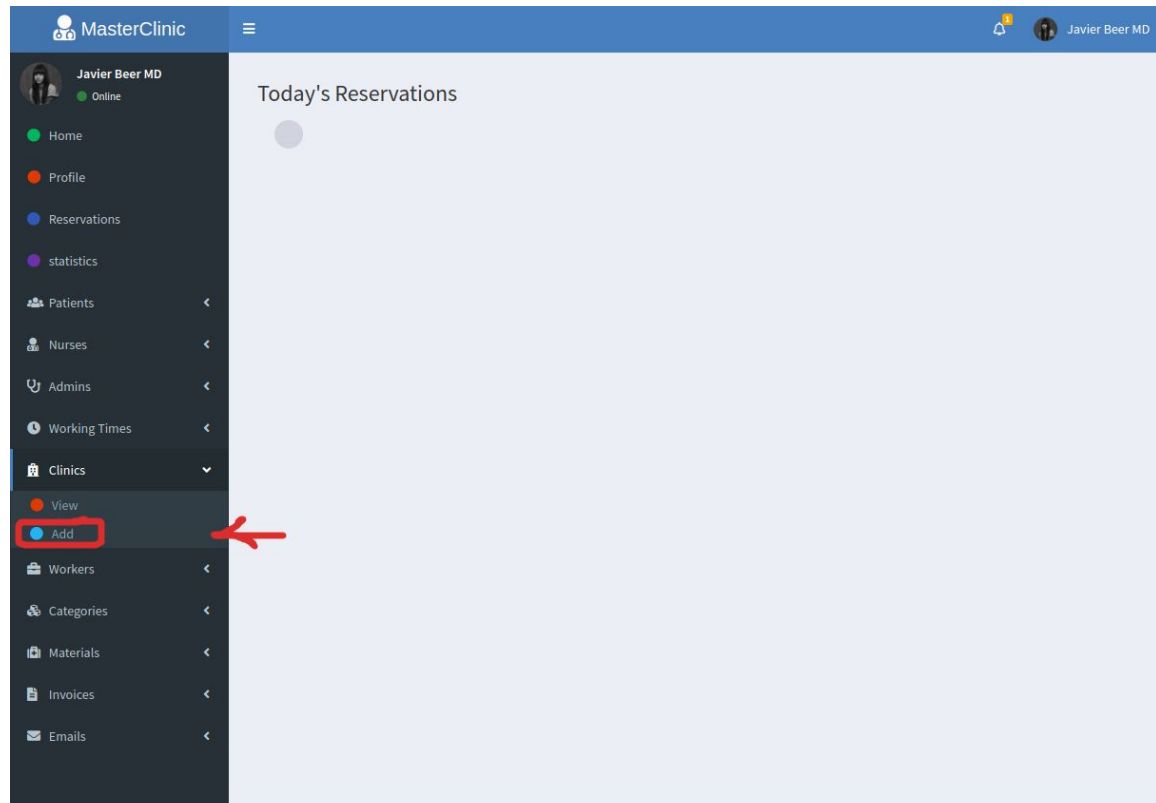

Figure 2: create clinic step 1

This would redirect you to a page containing a form that requires the clinic data. Enter the clinic data and submit the form like the following:

The screenshot shows the MasterClinic web application interface. On the left is a dark sidebar with a user profile for 'Javier Beer MD' (Online) and a list of navigation items: Home, Profile, Reservations, statistics, Patients, Nurses, Admins, Working Times, Clinics (expanded), View, Add, Workers, Categories, Materials, Invoices, and Emails. The main content area is titled 'Add a new clinic' and contains a form with the following fields: 'myClinicName', 'myClinicEmail', 'myClinicTelephoneNumber', and 'myClinicAddress', each with an icon on the right. Below these are 'Start Time' and 'End Time' fields, both set to '01:30 AM' with clock icons. A blue 'Register' button is at the bottom of the form. The footer of the page reads 'Copyright © 2018-2018 MasterClinic. All rights reserved.'

Figure 3: create clinic step 2

Now after you created your clinic you need to create a nurse to take patient reservations. Choose add from nurse section like the following:

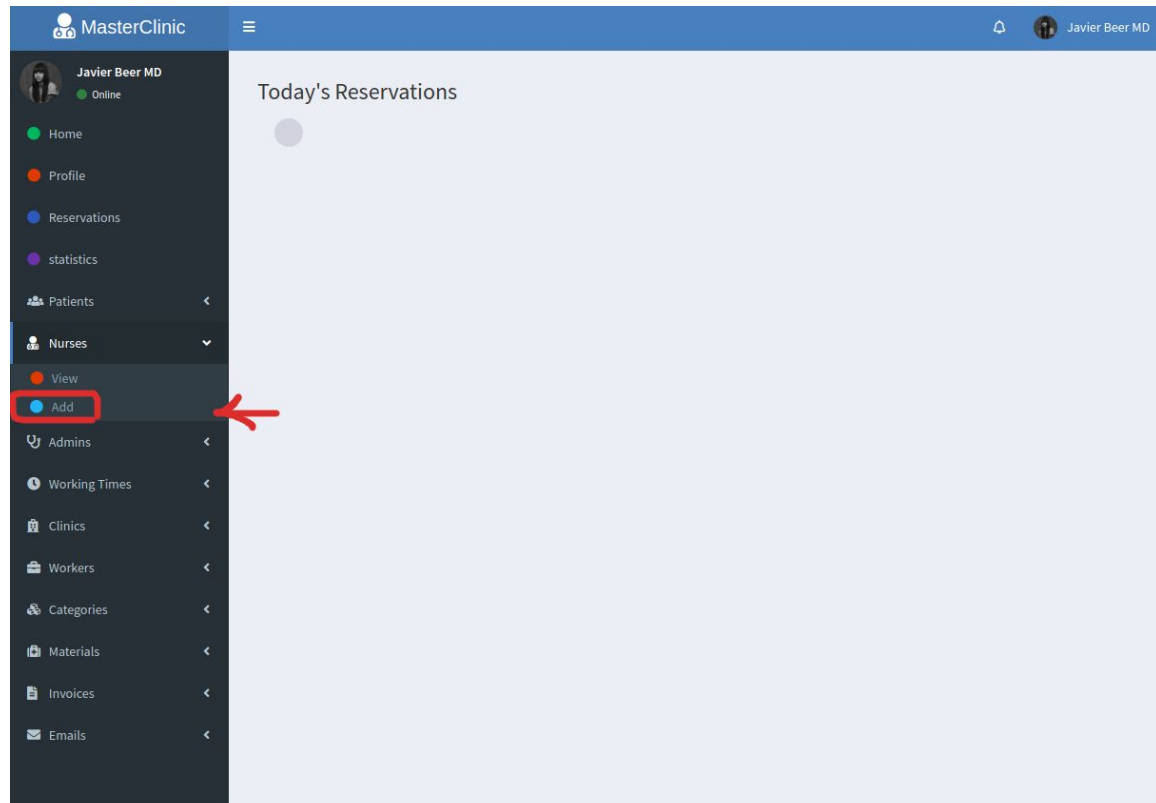

Figure 4: create nurse step 1

This would redirect you to a page containing a form that requires the nurse data. Enter and nurse data and submit the form like the following:

The screenshot shows the 'Add a new nurse' form in the MasterClinic application. The form is located in the main content area, with a sidebar on the left containing navigation links. The sidebar includes links for Home, Profile, Reservations, statistics, Patients, Nurses (selected), Admins, Working Times, Clinics, Workers, Categories, Materials, Invoices, and Emails. The 'Nurses' section is expanded, showing 'View' and 'Add' options. The 'Add' option is selected, leading to the 'Add a new nurse' form. The form contains the following fields and sections:

- nurseFullname**: Text input field with a user icon.
- nurseEmail**: Text input field with an email icon.
- Password**: Text input field with a lock icon.
- Confirm password**: Text input field with a lock icon.
- nursePhoneNumber**: Text input field with a phone icon.
- Birthday**: Text input field with a calendar icon.
- nurseSalary**: Text input field with a dollar sign icon.
- Choose Clinic**: Dropdown menu.
- Start Day**: Text input field with a dropdown arrow, currently showing 'Saturday'.
- End Day**: Text input field with a dropdown arrow, currently showing 'Sunday'.
- Start Time**: Text input field with a clock icon, currently showing '01:30 AM'.
- End Time**: Text input field with a clock icon, currently showing '01:30 AM'.
- Gender**: Radio buttons for 'Female' (selected) and 'Male'.
- Register**: Blue button at the bottom.

Figure 5: create nurse step 2

Now after you created your nurse you need to create your patients. Choose add from patient section like the following:

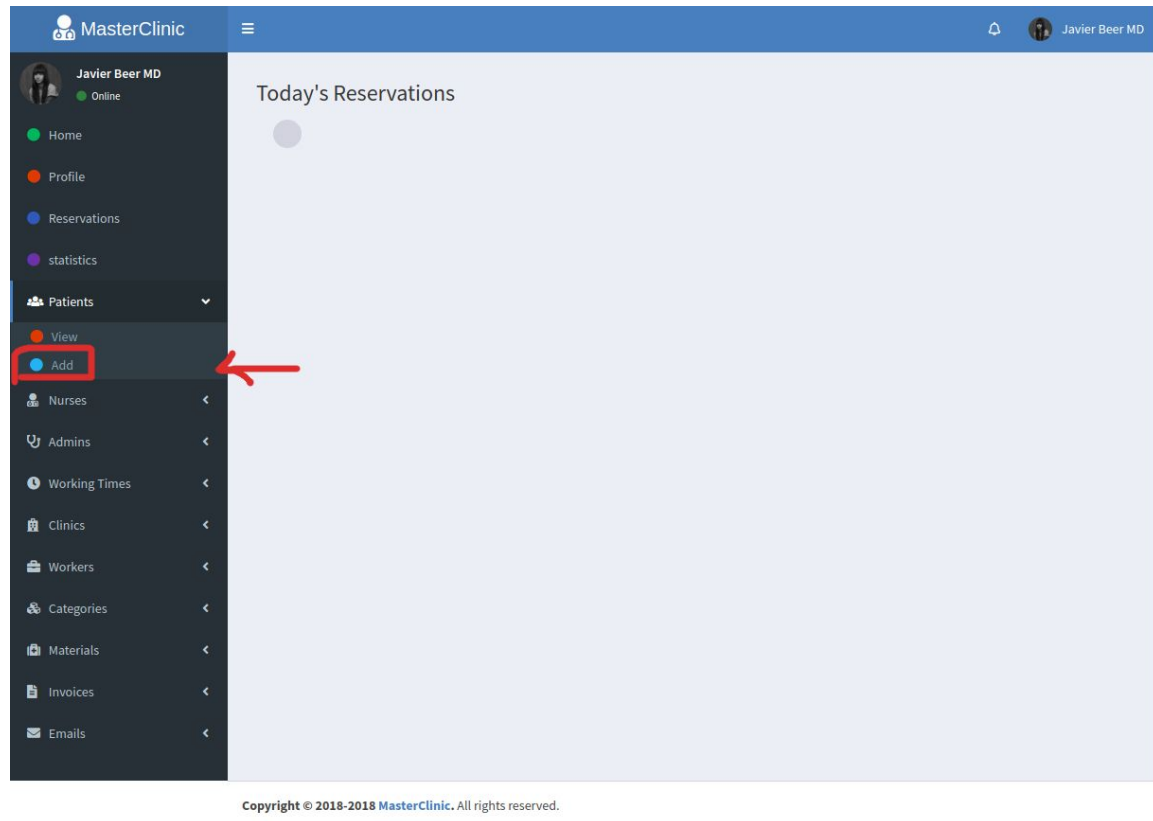

Figure 6: create patient step 1

This would redirect you to a page containing a form that requires the patient data. Enter and patient data and submit the form like the following:

The screenshot displays the 'MasterClinic' web application interface. On the left is a dark sidebar with navigation links: Home, Profile, Reservations, statistics, Patients (expanded), View, Add, Nurses, Admins, Working Times, Clinics, Workers, Categories, Materials, Invoices, and Emails. The main content area is titled 'Register a new patient' and contains a form with the following fields: patientFullname, patientEmail, Password, Confirm password, patientMobileNumber, and Birthday. Below these fields are radio buttons for 'Female' and 'Male', with 'Male' selected. A blue 'Register' button is at the bottom of the form. The top header shows the 'MasterClinic' logo and the user 'Javier Beer MD'. At the bottom, a copyright notice reads: 'Copyright © 2018-2018 MasterClinic. All rights reserved.'

Figure 7: create patient step 2

Now you are ready for work give every user there email and password. For more details about every user functionalities see section 5 below.

5. Usage Instructions

Admin

To start running the program open any web browser and for local server type <http://localhost:8000/admin/login> in the URL filed after running the commands mention in the previous section after Composer installation. if the website is hosted on an online server replace localhost:8000 in the previous link with your website domain the result would look like this: <http://domainname/admin/login>. This would open the admin login-page of the website which would look like the following:

MasterClinic

Home

Contacts

Login

Admin Login

Email:

Type your email

Password:

Type your password

☐ Remember Me

Login

[Forgot Your Password?](#)

localhost:8000/admin/patient/view#

Figure 15: admin view patients

View page in the admin section would show a table of all available patients with five functionalities for every patient labeled red in the previous figure:

1. change state (active or in active)
2. update patient (yellow button with pen drawing in the red box)
3. view file (blue file button with file icon in the red box)
4. email patient (green button with envelope icon in the red box)
5. delete patient (red button with delete icon in the red box)

by clicking on the activate button (button arrow is pointing to in the previous figure) the state of the patient will change to inactive and the button would change to green color with text on it active if the patient was in active state and vise versa. All other functions are a simple forms that would filled then press the submit button.

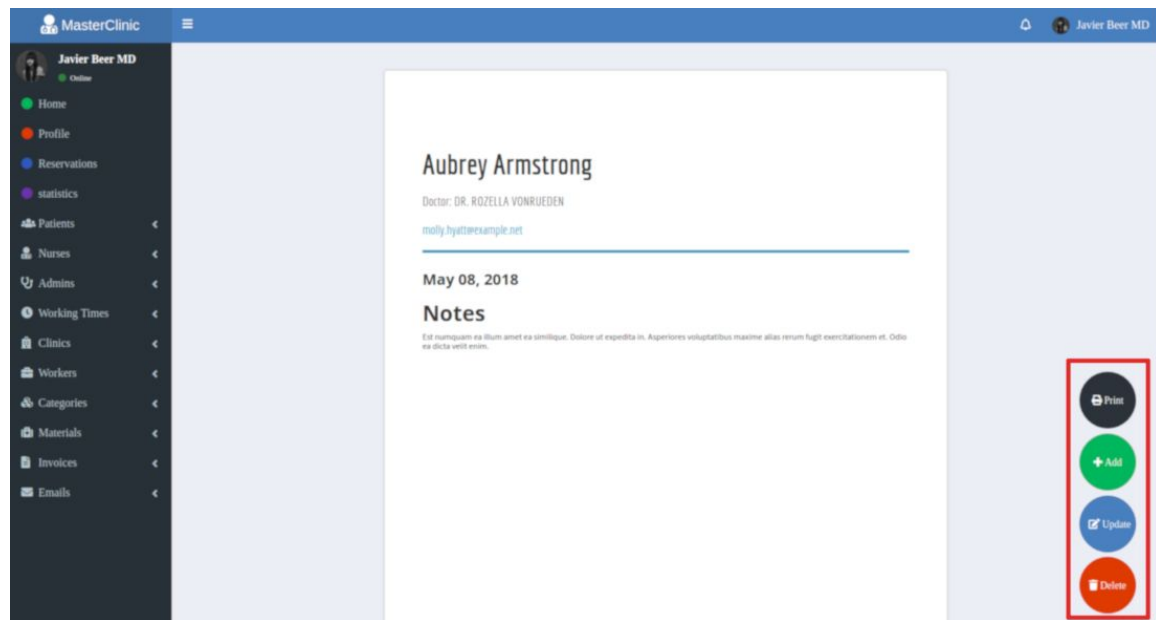

Figure 16: admin patient file

In this page admin can view patient file and perform four functionalities on it labeled by the red box in the previous figure.

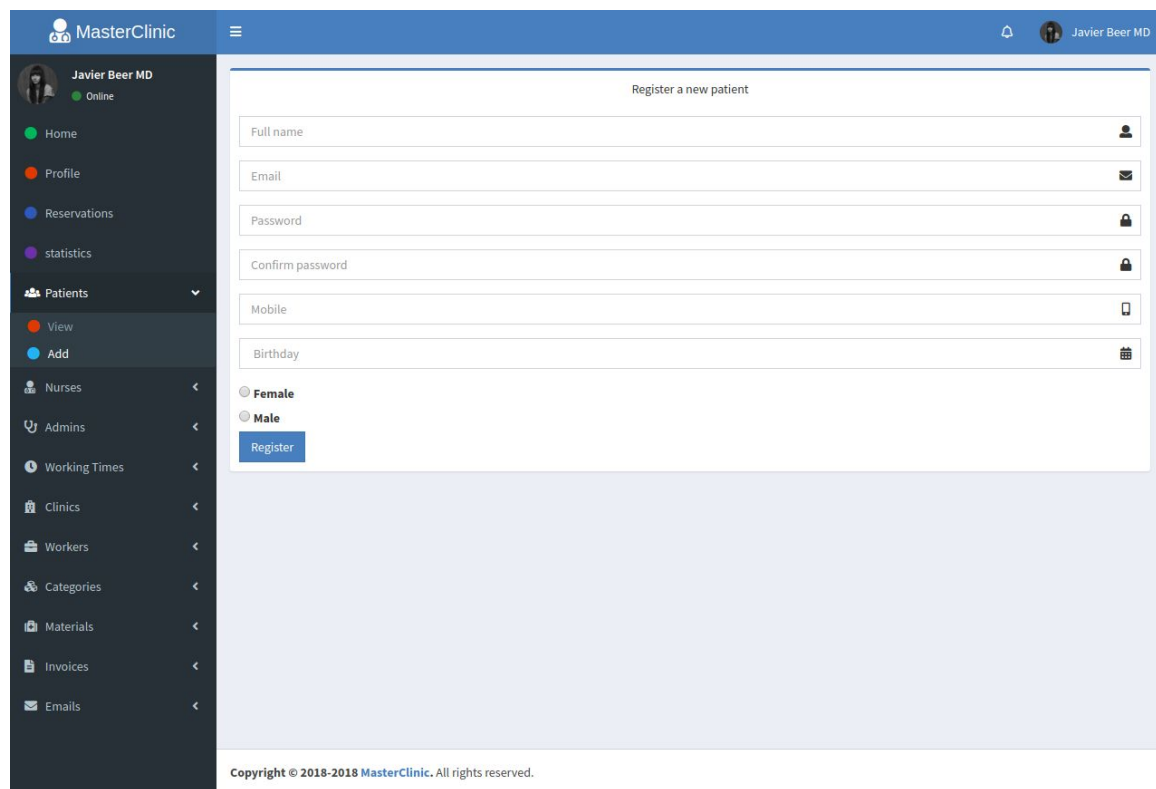

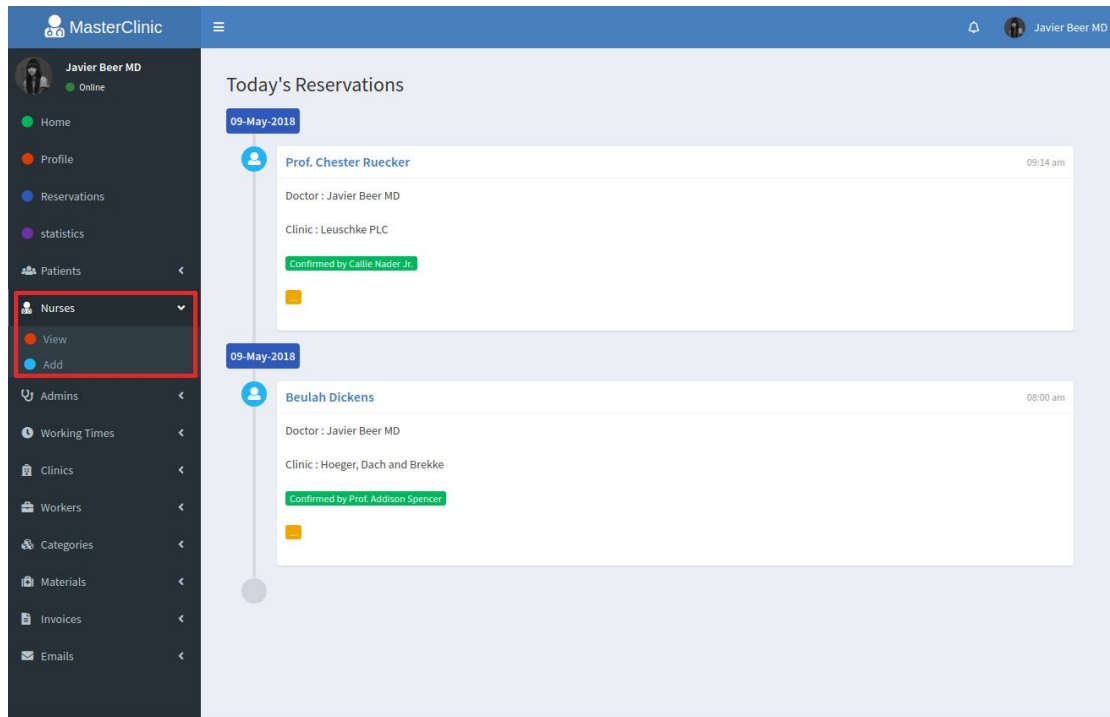

Figure 17: admin add patient

In this page would fill the form to add a new patient.

Nurse Section

Figure 19: admin view nurses

This page is the same as view patients page, however with less functionalities as nurses doesn't have files and admin can't send emails to nurses.

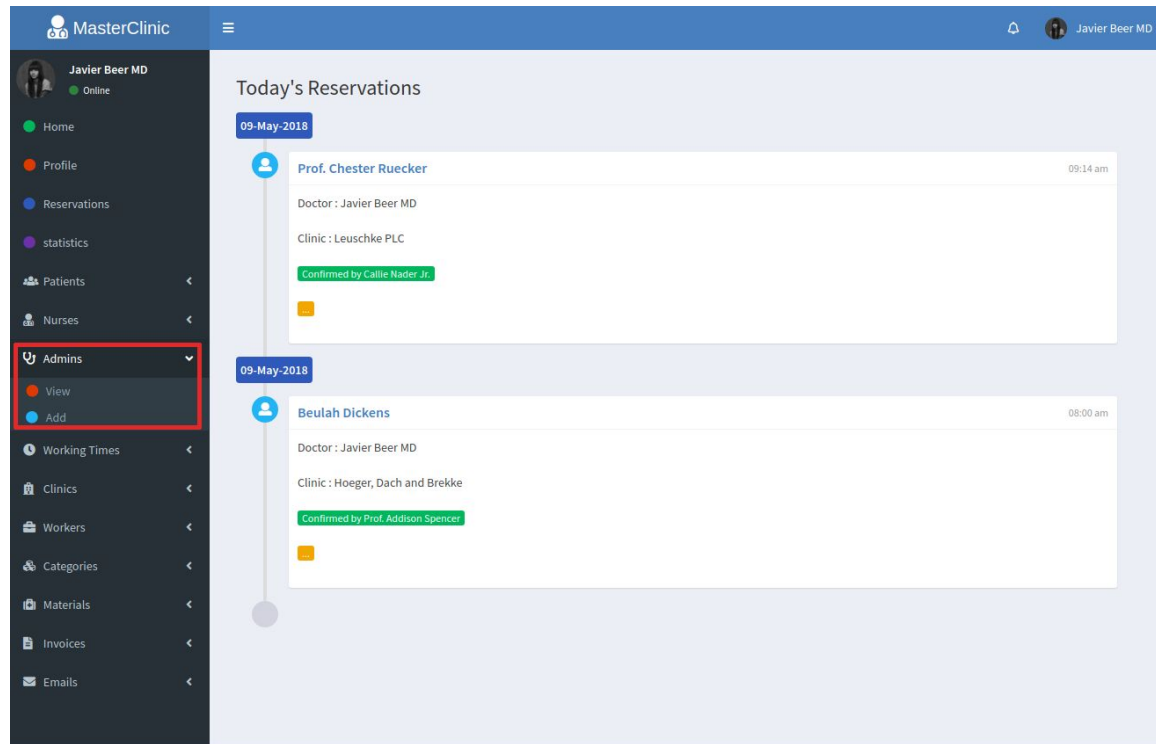

The screenshot shows the 'Add a new nurse' form in the MasterClinic application. The form is located in the main content area, and the left sidebar contains the navigation menu. The form fields are as follows:

- Full name
- Email
- Password
- Confirm password
- Mobile
- Birthday
- Salary
- Choose Clinic
- Start Day: From
- End Day: To
- Start Time: 11:45 AM
- End Time: 11:45 AM
- Female
- Male
- Register

Figure 20: admin create nurse

In this page would fill the form to add a new nurse.

Admin Section

Copyright © 2018-2018 MasterClinic. All rights reserved.

Figure 21: admin section

This section is for functionalities that are performed on the admin and appear only for super admins. If the admin is not a super admin the view would be like the following.

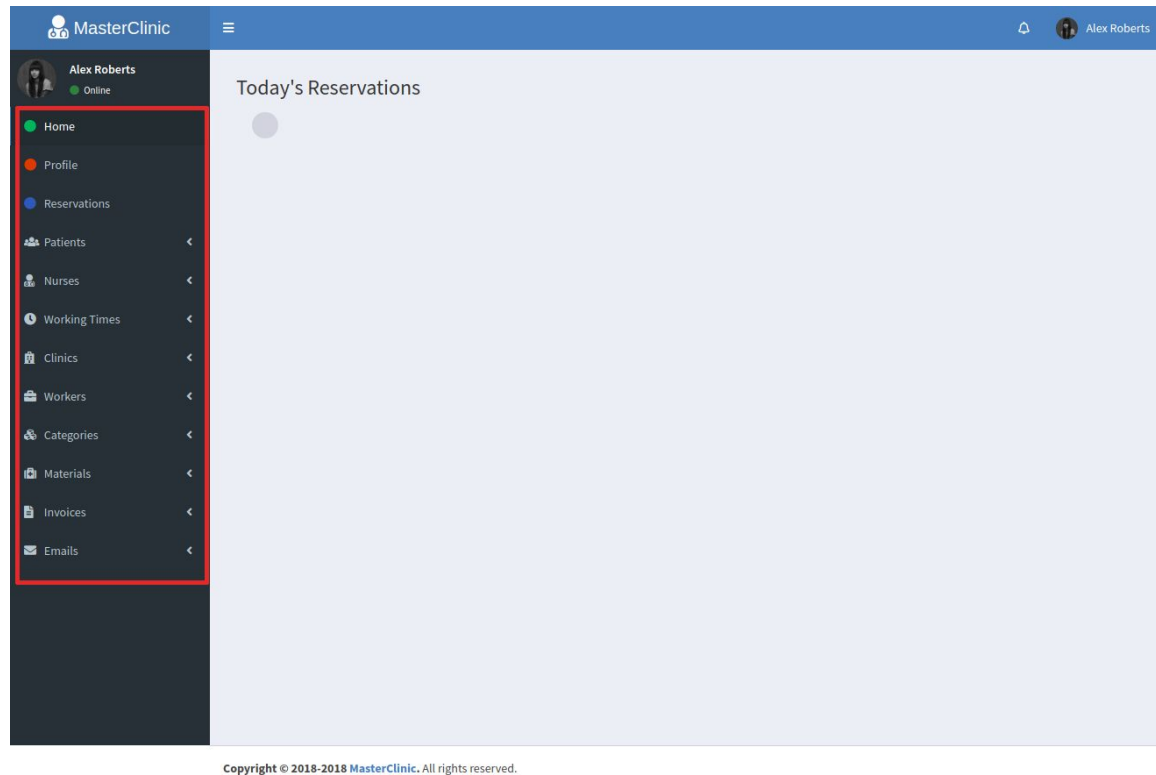

Figure 22: not super admin home page

The admin section is the same as patient and nurse sections. Two page one for admins table with same functionalities as nurse table and a create page for adding new admins.

Working Times Section

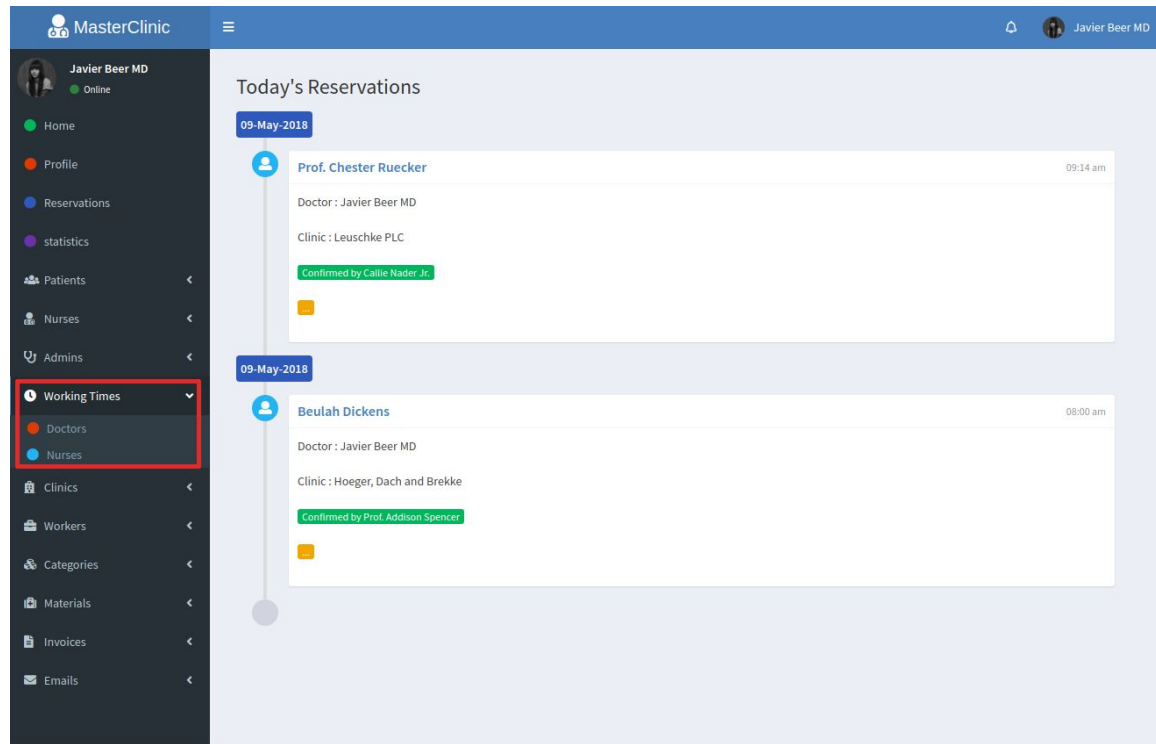

Figure 23: admin working times section

this consists of two tables one for admins and one for nurses. The tables contains working times of admins and nurses.

Rest Of Sections Except emails

Clinics, workers, categories, materials and invoices are all exactly the same in terms of functionalities and are exactly as admin and nurses sections with simple difference in the invoices section and materials section.

Figure 25: admin view materials

In materials view admin have an icon for decrementing number of the material when used and also to trigger the minimum number alert if the number is lower than the minimum number.

Email Section

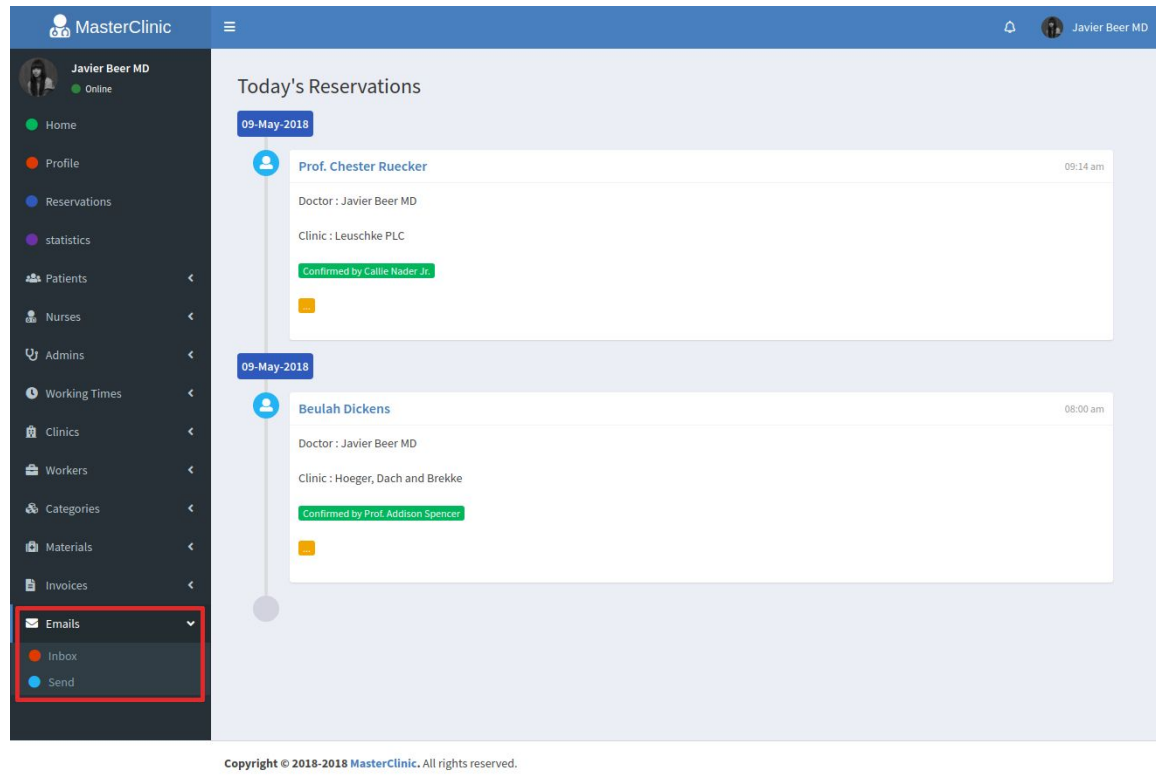

Figure 26: admin emails section

This section have different pages than the other sections. First page email inbox which is traditional mail inbox that views emails with delete and mark as read. The second is email compose page for sending emails to patients. There is also a read page to read inbox emails.

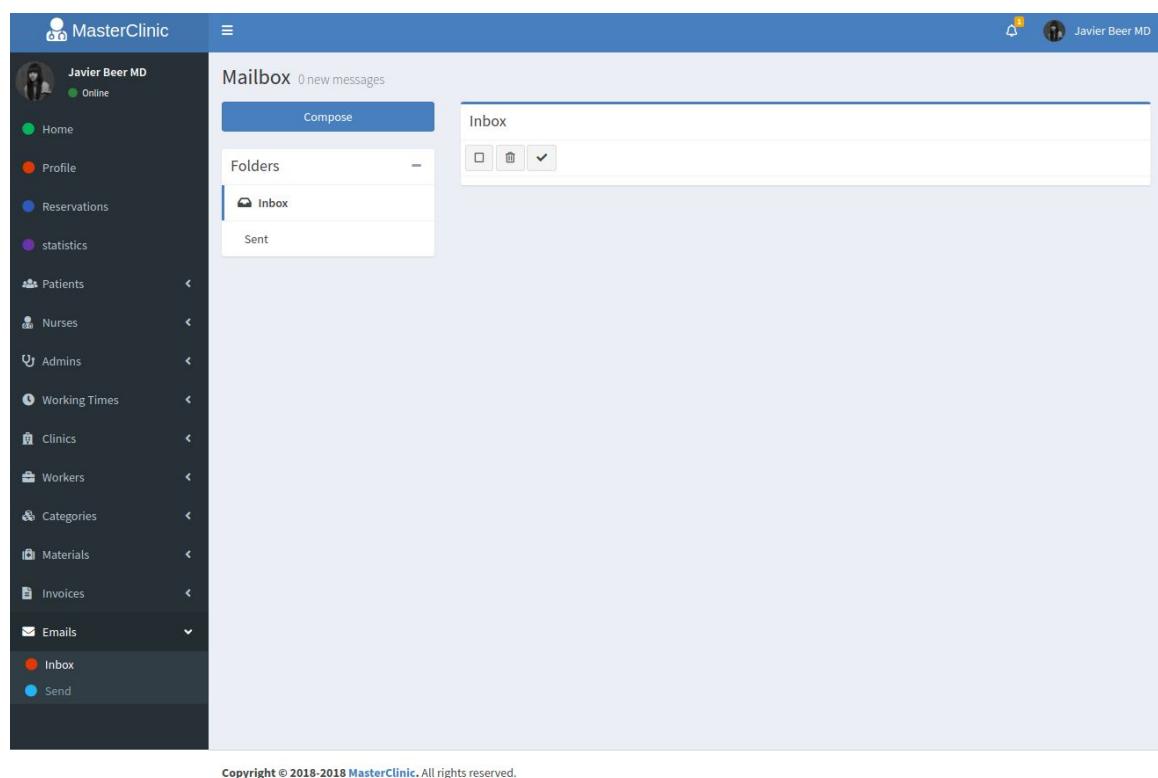

Figure 27: admin inbox

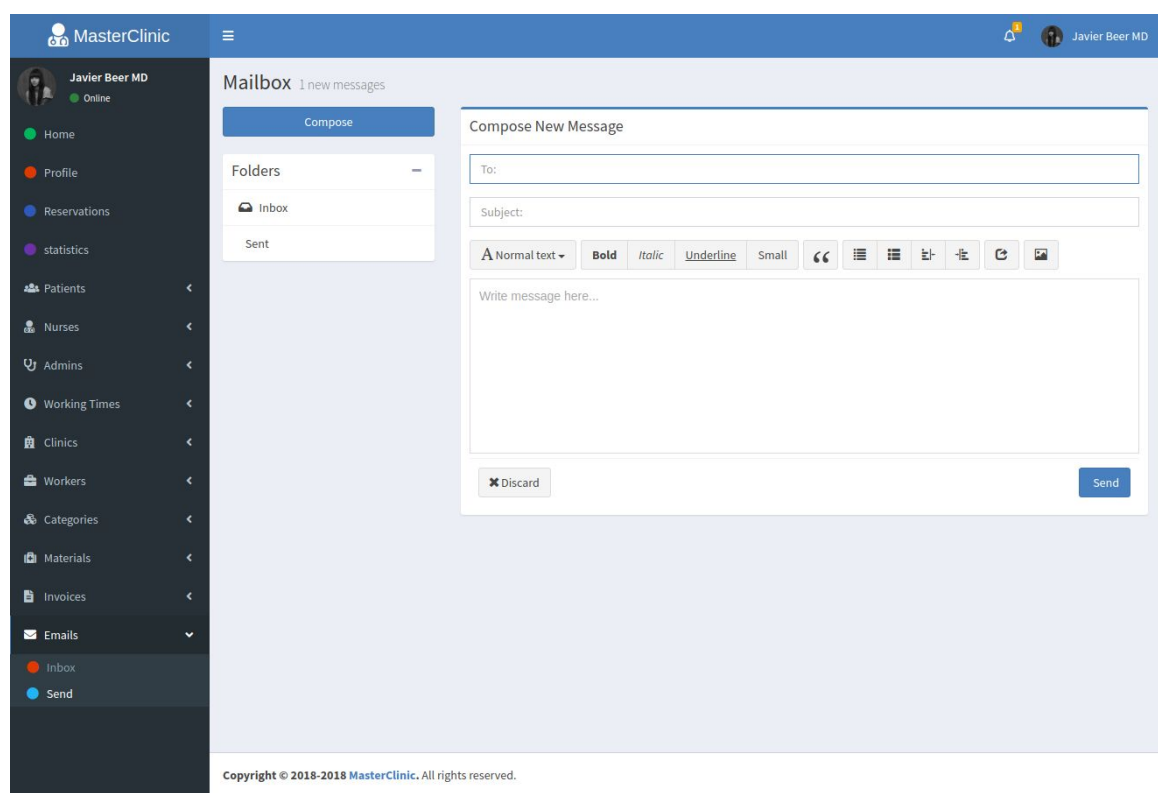

Figure 28: admin compose email

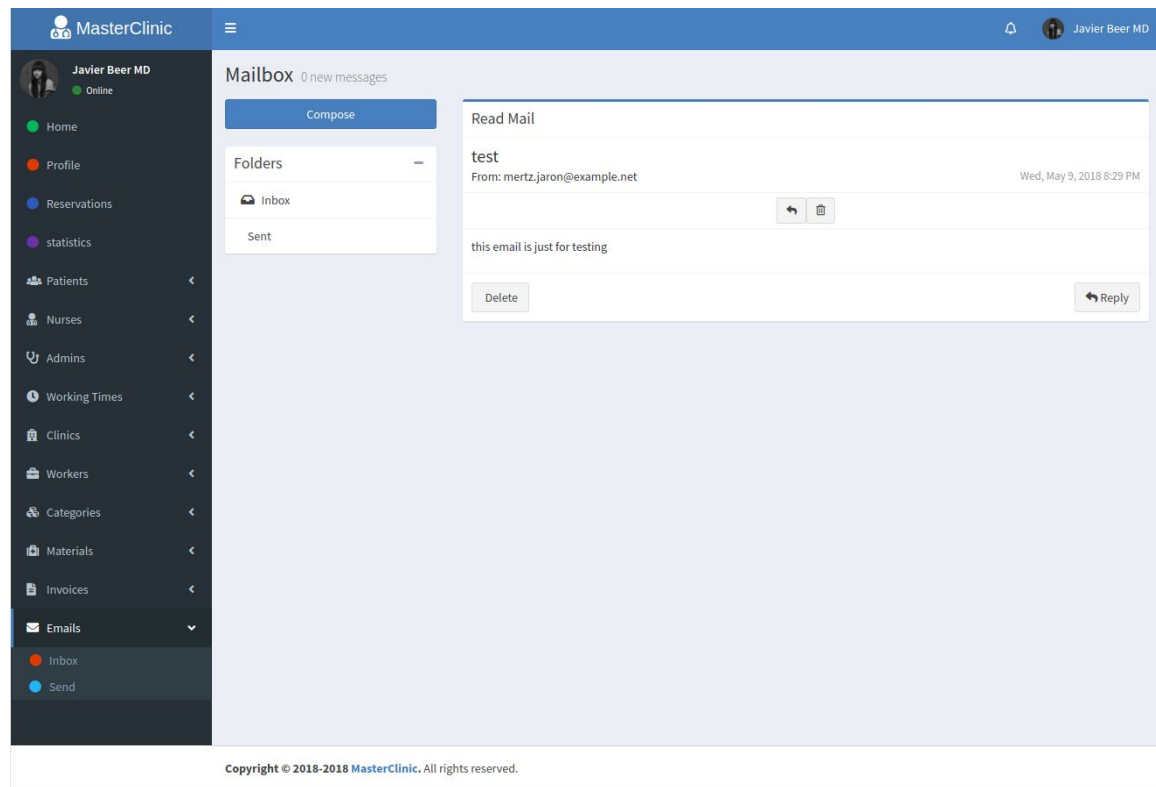

Figure 29: admin read email

Notifications

Admin also have a notification drop down menu that shows material notifications if the materials are less than minimum value then the admin gets a notification that alerts him that material is less than the minimum number. There is also a notification page where admin can delete or edit the notification he have.

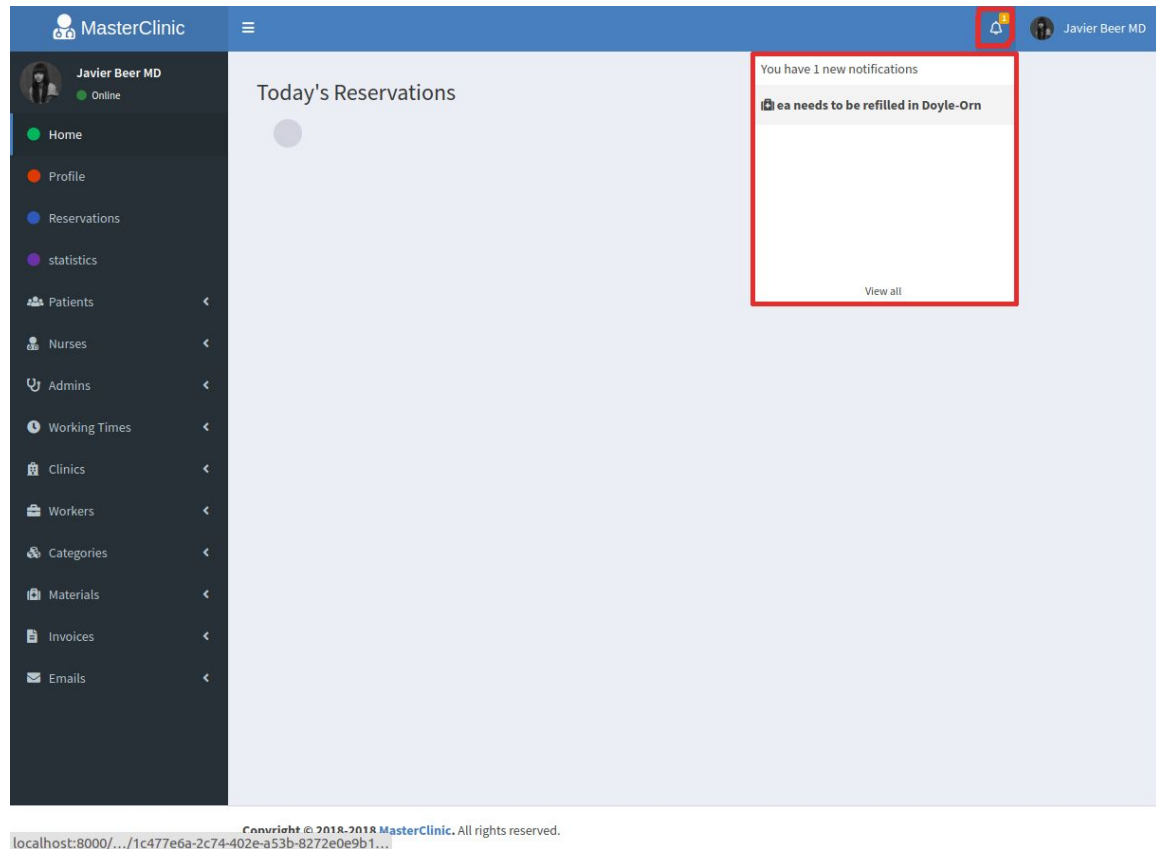

Figure 30: admin notification drop down menu

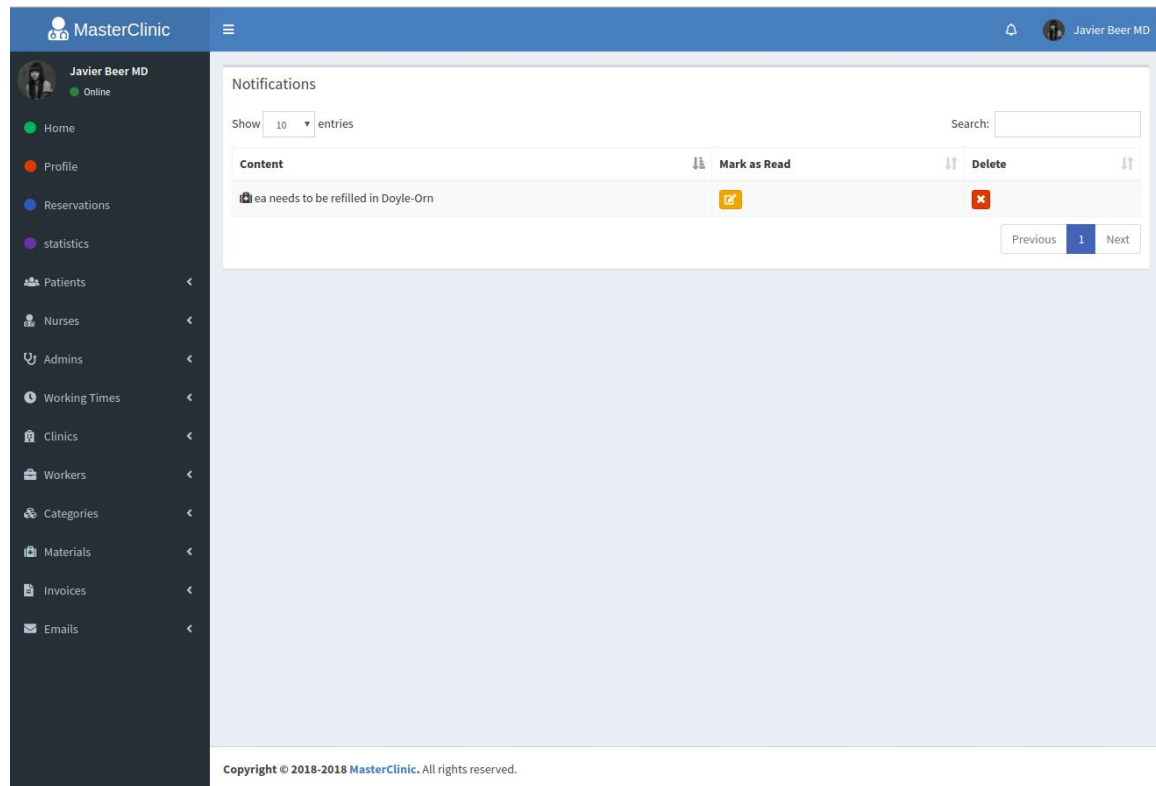

Figure 31: admin notification page

Nurse

Nurse is like a smaller version of the admin that can perform some of his functionalities. The only difference is that nurse can confirm reservations. Other than that all nurses functions are exactly as it's equivalent in the admin. Except for patient and patient file view as nurse can't send emails so email functionality is removed and it only can print or delete the file. Nurse also does have notifications.

The screenshot displays the MasterClinic interface for a nurse, Ms. Jordane Rau. On the left is a dark sidebar with navigation options: Home (green dot), Profile (orange dot), Reservations (blue dot), Patients (grey icon), Invoices (grey icon), and Working Times (grey icon). The main area is titled 'Today's Reservations' and lists three appointments for 09-May-2018, each with a patient profile icon, name, doctor, clinic, confirmation status, and a 'Confirm Attendance' button.

Patient Name	Doctor	Clinic	Confirmation	Time

Figure 34: nurse patient file

Patient

patient view is far different from admin and nurse views especially in the UI. Patient view doesn't have a side navigation bar as his functionalities is very small enough to be all put in the navigation bar.

About Us

A Group of dental clinics. Here you can book an appointment with a doctor , clinic , date and time from your own choice. You can also see all information about our clinics to see the nearest clinic to you. We have the best doctors in Egypt, The best service ever.

Figure 35: patient index page before logging in

Before logging in the patient would have the previous figure that only contains a link for the login page and contacts page.

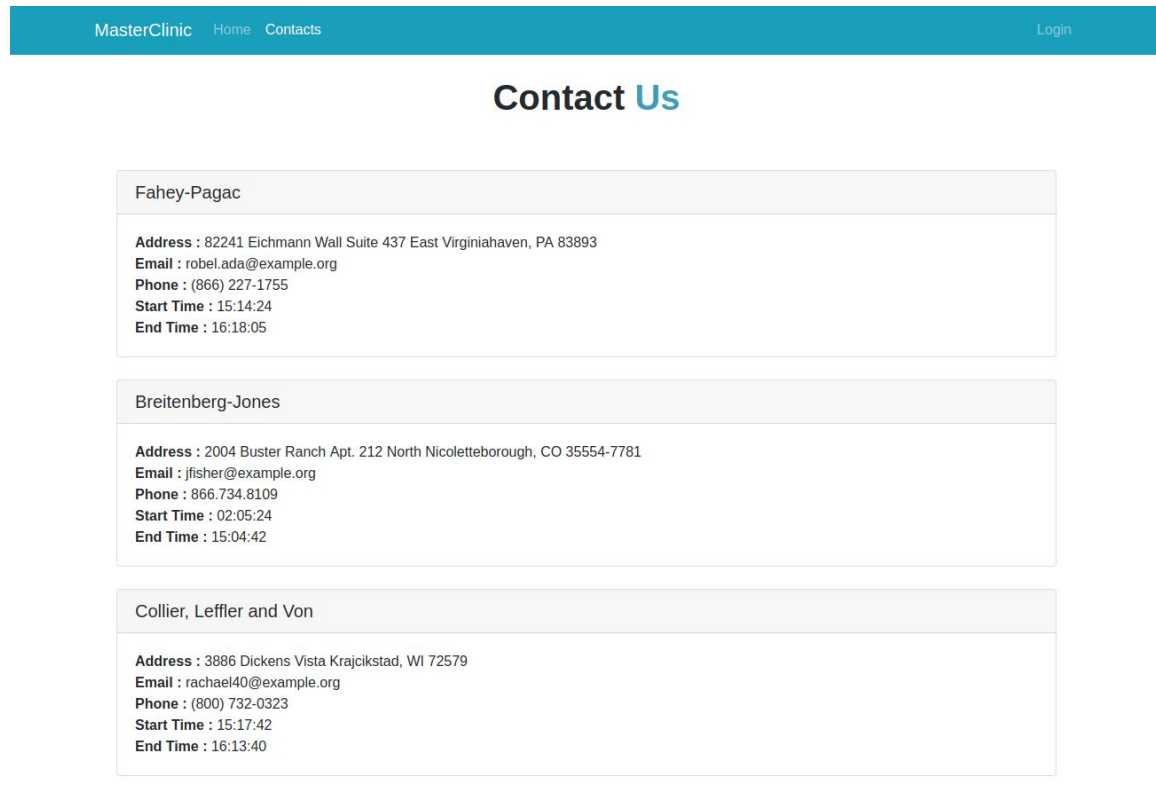

Figure 36: contacts page

Contacts page would look like the previous figure which is a static page that contains a section for each clinic that contains contact info of the clinic.

Figure 37: login page

Login page contains a form with two fields one email and one for password. the patient would enter the data and submit the form to login.

About Us

A Group of dental clinics. Here you can book an appointment with a doctor, clinic, date and time from your own choice. You can also see all information about our clinics to see the nearest clinic to you. We have the best doctors in Egypt, The best service ever.

Figure 38: patient home page

After logging in the patient is redirected to the home page which is the same as index page however some functionalities are added to it:

1. The navigation bar would have more links for patient functions.
2. A dropdown menu containing patient profile photo with a link to the profile and a link to logout
3. The login button in the index page is replaced with a link to make an appointment for quick usage

Navigation Bar Links

Home link is a link for the home page so it would give the same home page again if pressed.

Profile link would redirect to the patient profile page in which patient can update his profile data.

Figure 39: patient profile page

Reservation link would redirect to reservation history page that contains patient reservations history in which patient can review his reservations and update or delete any pending reservations. It also contains a link to make a new reservation exactly as the link in the home page.

Reservation History

[Make an appointment](#)

#	Doctor	Clinic	date	Time	Status	Attendance	Controls
1	Javier Beer MD	Fahey-Pagac	12-05-2018	08:30 AM	Reservation Confirmed by Kattie Bartell		<div>   </div>
2	Mandy Will	Bauch LLC	28-09-2010	01:13 PM	Reservation Confirmed by Parker Harber	Didn't attend	
3	Prof. Malcolm Marquardt	Breitenberg-Jones	25-10-2002	03:33 AM	Reservation Confirmed by Liliyan Macejkovic	Didn't attend	
4	Rebeca Abbott	Feest Ltd	25-08-2000	07:09 AM	Reservation Confirmed by Callie Nader Jr.	Attended	
5	Ford Welch	Nader, Kirlin and Swift	17-01-1994	02:47 PM	Reservation Confirmed by Franco Little	Attended	
6	Nona Jast	Gulgowski-Skiles	06-01-1988	02:37 PM	Reservation Confirmed by Kattie Bartell	Attended	
7	Dr. Nasir Ryan DVM	Kshlerin Ltd	31-07-1971	10:37 PM	Reservation Confirmed by Isac Huel	Didn't attend	

Figure 40: patient reservations page

Invoices is the same as reservation as it redirects to invoices history page, however patient can only print the invoice no update or delete functionality is available for the patient.

Figure 42: patient email page

File link is a link that redirects a page that is like the admin and nurse file view however no functionalities is provided at all patient can only view the file.

Figure 43: patient file page

The last link is the contacts link which redirects to the contacts page mentioned previously.

6. Troubleshooting

This is main problems you may face in running this application and its solution:

1. This site can't be reached

Figure 44: troubleshoot site can't be reached

This means that your server is not running so all you need is to run the server by opening terminal in project folder and type ``php artisan serve``.

2. Check internet connection

Whoops, looks like something went wrong.

Figure 45: troubleshoot no internet connection

This is an error when any problem happen but if you try to send an email and you get this message that mean your internet connection is not established.

7. Points of Contact

For any problem or feedback you can send an email on one of these emails

- hadymaher311@gmail.com
- abdomedono2014@gmail.com
- rehamhy6@gmail.com
- aishamousa632@yahoo.com
